

The image features two cylindrical light fixtures against a black background. On the left, a white cylinder is illuminated from within, creating a bright, warm glow at its open end. On the right, a black cylinder is shown, which is not illuminated. Both cylinders are positioned diagonally, with the white one lower and to the left, and the black one higher and to the right. The lighting highlights the smooth, matte texture of the fixtures.

**Specifier:** .....

Stema is a free standing table Lamp that was designed and conceptualized to fit into any office setup. It has a sleek look and elegant shape that makes it unique.

The product is available in Deep Black and Ice white finishes, with LED color temperature going from cozy 2700K, warm 3000K, to blue white 4000K for more focus.

It has a pure leather wireless charging base, offering a soft touch surface for mobile devices.

The head is equipped with sensors to turn the light On and Off. Second sensor allows the user to control the intensity dimming.
